Claim Objections

Claims 1-7 are objected to because of the following informalities: In claim 1 lines 8-9, the phrase "its mounting surface to said upper rotating body" is grammatically awkward. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Japanese reference 2001348911A.

Japanese reference 2001348911A discloses a counterweight mounting structure including an upper rotating body, a counterweight 21 with a predetermined gap and a recessed portion and an elastic soundproof member 45 pressed against an end surface 20 of said counterweight mounting member as shown in figure 7.

Allowable Subject Matter

Claims 5-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
